### Choose TargeT Mode: aCTive or Passive

The Trimble® S6 Total Station combines passive prism tracking with active Target ID via the new Trimble® MultiTrack technology. The instrument will lock and track a wide variety of targets and conventional prisms to exceptional range. Its flexibility expands opportunities in all surveying applications.

### Target id

With the Trimble S6 you will always find and lock to the correct target via Target ID. Use multiple prisms on a site, and always lock to the one you need. Save time by eliminating lock onto false targets.

### Magdrive servo TeChnology

The Trimble S6 redefines instrument performance with unsurpassed integration of servos and angle sensors. The instrument's advanced error compensation provides fast, accurate measurements every time. With the smooth, silent servo motors of MagDrive servo technology, the Trimble S6 offers exceptional speed and accuracy.

### high CaPaCiTy iTernal BaTTery wiTh iTelligenT sysTeM Charger

The Trimble S6 runs for six hours in Robotic mode on one internal lithium-ion battery, with no cables needed. The battery is intelligent, so you can quickly check how much power each battery contains.

With three batteries in the multi-battery holder, you'll spare yourself the task of changing batteries during your work day. Recharge your Trimble S6 and GPS system batteries in the same charger.

### surePoinT aCCuraCy assuranCe

The Trimble S6 Total Station aims and stays ... through windy weather, vibrations, handling, and sinkage, by actively correcting unwanted movement. This technology, Trimble's unique SurePoint

accuracy assurance, ensures accurate pointing and measurement every time. Reduce aiming error and avoid costly re-measurement for supreme confidence in your results.

### direCT reflex TeChnology

Direct Reflex (DR) technology from Trimble enables measurement without a prism even to exceptional distances. Hard-to-reach or unsafe targets are no obstacle for the Trimble S6. Measure quickly and safely without compromising accuracy.

### Coaxial oPTiCs, edM, TraCker, laser PoinTer

Whether measuring in Face 1 or Face 2, or aiming manually or with the tracker, with Trimble S6 what you see is what you measure. The Trimble S6 optics by Carl Zeiss are fully coaxial for full measurement confidence.

### iNTegraTed surveying

Only a Trimble total solution offers field-proven optical and GPS integration from field to office. The Trimble controller of your choice connects without cables to your Trimble S6 or GPS system. It can be switched between sensors, collecting all data into one job file for seamless data transfer. Simply use the sensor that best suits your environment or job requirement.

### gPs searCh/geoLoCk

GPS Search lets you maximise Trimble S6 Total Station speed. GPS Search uses GPS positioning to locate a prism anywhere, anytime, so that with a Trimble I.S. Rover, or even a GPS card, or Bluetooth receiver, the Trimble S6 system will locate the prism in just a few seconds.
